Thankagiving Prostamation. BY THE GOVERNOR

In harmony with the praiseworthy custom of expressing gratitude for the blessings vouch-safed during the year past, and in conformity with the proclamation of the president of the United States, I, Jeremiah M. Rusk, governor of the state of Wisconsin, do hereby designate and appoint Thursday, the 29th Day of Novemnen, instant, as a day of general thanksgiving. And I do recommend that the people of the state tay aside their usual avocations on that day, and in their accustomed manner give thanks to an All-Wise Providence for the numerous bounties enjoyed during the year, and ask the continu-iance of prosperity to the state and happiness in

the homes of all the people.
In testimony wherenf, I have becenute set my hand and caused the Great Seal of the state of Wisconsin to be allixed, Done at the city of Madison, formers salithis seventh day of November, in the year of our Lord, one thousand eight hundred and eighty three.

THE HARTLEY CLIFFORD MUNDER CASE.

The supreme court has affirmed the judgment of the Rock county circuit court in the case of Hartley Chifford for the murder of Captain Pugh at Racine, in 1882. He was found guilty of murder in the first degree and was sentenced by Judge Bennett to servitude in the state prison for the term of his nutural life From this judgment the defendant appealed to the supreme court. The chief points on which an appeal was taken, were-

First, that the verdict was against the evidence.

Second, that it was an error to allow eleven jurors already accepted to separate before the entire panel was filled, and Third, that the instructions of the

court to the jury in relation to the matter of self defense, were erroneous and an minstice to the prisoner. Judge Orton rendered the opinion in

which a full bench agroed, and the principal points in the decision are the following:

On scanning and closely considering the testimony, we cannot resist the con-clusion, that Hartley Clifford shot to death William R. Pugb, on the 12th day of April, A. D. 1882, with a promeditated dosign to effect his death, and that he was thereby guilty of murder in the first degree, and that there was no error of law upon his trial.

The onuse was very ably tried by the learned councel on both sides, and especially by the learned judge, and the various points of exception have been ably and fully presented and argued by the learned counsel in this case.

It seems clear to us that from the evidence the defendant could not have properly been convicted of anything less than murder in the first degree, or should not have been convicted at ail. The characteristics of the shooting stand holdly out and indicate a deliberate and predetermined and premeditated design to kill. The first shots were fired when the deceased was distant from the defendant eight or nine feet, and when the deceased had desisted from any assault or aunoyance of the defendant, and the last of the two fatal shots was fired when the deceased was evidently on the retreat the deceased was evidently on the retreat and making an effort to get away from the danger. When the deceased, after having his attention called to the defendant's drawing his revolver, from the ejaculation of his friend, 'What are you doing?' threw up his hands and said, 'I am unarmed,' and the defendant the hor hours senerated from the defendant then being separated from the deceased about nine feet, and standing at the foot of the stairs leading into the third story to which he pretended he had started for his bed, and could have readily gone up those etairs if he had chosen to do so, without any hindrance from the deceased who was so far from him, and then turned around and fired deliberately four shots towards the doceased, even if two of them were fired into the floor, as he pretends, and pursued the deceased and shot him dead, while he was evidently on the retreat. Can this be less than murder in the first degree? We think not, and therefore cannot order a new trial in the case.

The judgment of the circuit court is affirmed. Hartley Chifford is now in the peniten-

He is a young man, not above 30, we judge, and therefore his future will be werse than death itself The opinion of the supreme court will he a severe blow to his mother who fondly indulged in the hope that ber son would be granted a new trial, and in that event would either get acquitted or have the crime reduced to manslaughter, in which case his confinement would he comparatively short.

MICHIGAN MINERS.

They Raise Cain in the Iron Region.

A Force of Pinkerton's Men on Hand With Rines ... The Simulion at Norway ... The 3ron Trade.

Inon Mountain, Mich., Nov. 21 .- There is intense excitement here over the miners' strike. Albert Como, general superintendent, and J. H. Van Dyke, vice-president of the Menominee Mining company, arrived from Description to hear Court Homes Restory.

Menominee Mining company, arrived from Milwaukee, They were preceded only ten minutes by a special train carrying fifty of Pinkerton's men and thirty deputies sworn in by the county sheriff. The miners held their customary meeting in the afternoon, and dispatched a delegation to the company's office to hear what retion was proposed to be to learn what action was proposed to be taken in regard to the strike. They were told that every man in the mine would be paid off to date as soon as the pay-roll could be made out, and the mine shut down for the present and probably all winter. When the answer was received at the meeting another delegation was sent out to see the ongineers and pump-runners and ask them to stop work. The action was prearranged, ovidently, for immediately every engineer and pump-runner in the mine left his post, and it is now slowly but surely filling with water. Three hours will suffice to put the mine in such a condition that it will be dangerous for men to go in and start the dangerous for the treathy four bours' story. pumps again, and twenty-four hours' stop-page of the pumps will flood the mine. The engineers say they are afraid to remain at their work, fearing violence at the hands of the strikers, but it is believed they have agreed to stick with the men. Despite the pro-tection which has been guaranteed by Pinkerton's men, none have thus far been induced to return to work and it is now thought that the strikers have the company where it that the strikers have the company water a must give in or see the property ruined. No riotous outhreak seems imminent. Lieut. Hay, in charge of Pinkerton's mea, says he is here to protect property; that if there is here to protect property. is bloodshed the trouble will be brought on by strikers. Fully 7,000 men are paraling the streets, cheering as they go along, stopping occasionally to allow the lenders to make speeches. The lenders advocate peace mand specences. The readers may beaute parternal means to carry their point. Only once this the strikers seem to lose their heads. Half a dozen of Pinkerton's men, carrying Windows chester rifles, were received with grouns and hisses. It is further said that the strikers have nearly 300 Winchesters stored in a placewhere they can lay hold of them at a moment's notice, but this is not generally be-lieved. The strikers are apparently more determined than ever. Other officers and stockholders of the company will arrive, when there may be, as is now expected, a change of tactics in dealing with the men.

> The Situation Alarming. Norway, Mich., Nov. 21.—After being idle for about two hours, pumps in the Chapin mine were started again by the master mechanic. The mine is under a strong guard of Pinkerton policemen. The strikers are becoming desperate. The strikers are becoming desperate. The police on guard at the company's office hooted and hissed at by the The miners also advised them to mob. strike for higher pay. Many residents of Iron Mountain, fearing trouble, are sending their families out of rown until the difficulty is settled. Business is at a stand still. Some

firms are fearful of losing thousands of dol-lars of account. Should the mines shut down several business houses will certainly be embarrassed. New Base Ball League. BALTIMORE, Nov. 21.-The new union

league of base hall clubs held a meeting here. The following were present: Felix J. Moses, of Richmond; John S. Hollingshead, of Washington; D. Massemore, of Baltimore; Henry H. Doddlebeck and Robert Furgeson, of the Keystone Club, Philadelphia; W. S. Miller, of Reading; and George Wright, of Boston. Brooklyn and Hartford were represonted by proxies. The Boston club was admitted to full membership, which makes eight clubs in the league, as follows: Richmond, Wash-ington, Monumental of Baltimere, Keystone of Philadelphia, Actives of Reading, Brooklyn, Hartford and Boston. Applications were received from Harrisburg, Pa., and Wilmington, Del., clubs, and placed on He. A committee to visit the annual meeting of the National league, to be held in Washington, and ask for full recognition of the contracts of this league, was appointed. The annual dues of the league were fixed at \$100. The meeting adjourned to meet Janu-

Bold Robbery. CLEVELAND, O., Nov. 21.-Horace and Marion Allen, two wealthy bachelor brothers, near the town of Newtonfalls, were roughly near the town of Newtonialis, were roughly handled by robbers. They have been accustomed to keep valuables and large sums of money in the house. Early in the morning masked burglars entered their residence, bound and gagged them and fired several shots from a revolver to frighten them, and filling a large has with money, bonds and silver-near the certains. bug with money, bonds, and silver-plate par-took of a hearty lunch and departed. Dethetives are searching for the thieves, but thus far manacessfully. The amount taken is not known, but will aggregate several thousands of dollars in value.

About Vinegar. WASHINGTON CITY, Nov. 2L -- Commis sioner Evans was not moved by the protest of the vinegar manufacturers against his recommendation that congress tax the alcohol used in the manufacture of vinegar. The commissioner considers the present system of manufacturing vinegar an invitation to fraud. He does not think that the petition of the vinegar men, that he put a man in each vinegar factory, at the expense of the manufacturer to watch for fraud, will meet the necessities of the case. He thinks the alcohol of vinegar factories should be taxed like all other alcohol and that the tax should be collected in the same way.

A New Point in Law.

New HAVEN, Conn., Nov. 21.-Quite an extensive trade has been built up by one Sohr, a brewer in this city, who goes into West Haven, in the adjoining township of Orange, which recently voted "no license," and distributes blank beer orders. His course claims that as the sales take place in this city there is no law that can prevent hin from delivering his goods in that place, Counsel have been rotained by the town of Orange to presecute the alleged viola-tions of the law and a lively time is expected.

JUSTICE HARLAN'S DISSENT.

What Robert G. Ingersoll Mas to Say About it.

WASHINNTON, Nov. 21.—A correspondent called upon Col. Robert G. Ingersoll at his residence, and asked: "What do you think of Justice Harlan's dissenting opinion in the civil rights case?"

The Colonel's answer was: "I have just

read it and think it admirable in every respect. the intention of the frames of the recent amendments. There is nothing in this opinion that is strained, sincere, or artificial. It is frank and manly. It is solid man sonry, without crack or flaw. He does not resort to legal paint or putty; or to verbal varnish or voncer. He states the position of his brethren of the bench with perfect fair ness, and overturns it with perfect case. He has drawn an instructive parallel between the decisions of the older time, upholding the power of congress to deal with individu-als in the interest of slavery, and the power conferred on congress by the recent amendments. He has shown by the old decisions that when a duty is enjoined upon congress, ability to perform it is given; that when a certain end is required, all necessary means are granted. He also shows that the fugitive slave acts of 1793 and of 1850, rested entirely upon the implied power of congress to enforce a master's rights; and that power was one implied in favor of slavery against human rights, and implied from languago shadowy, feeble and uncertain when conpared with the language of the recent amendments. He has shown, too, that congress exoreised the utmost ingenuity in devising laws to enforce the master's claim. Implication was held ample to deprive a human being of his liberty, but to secure freedom, the doctrine of implication is abandoned. As a foundation for wrong, implication was their As a foundation for right, it is now sand. Implied power then was sufficient to enslave, while power expressly given is now impotent to protect."

IMPORTANT DECISION.

Secretary, Teller Decides a Point In-

volving a City's Site. Washington, Nov. 21.—Secretary Teller has decided an important case involving, as it does, the title to the land upon which the city of Leadville, Col., is situated. It appears that cortain citizens of Leadville, through J. A. Green, made application to the commissioner of the general land office for permission to bring suit in the name of the United States to vacate Placer patents issued to Starr, Stevens, Leiter and others. The application was denled, and an appeal was taken to the sceretary of the interior. by Commissioner McVorland. He refers to the opportunity granted at the time by the dopartment to all adverse claimants to present their evidence, and after stating that the same circumstances and allegations, both of law and fact formerly presented are now again produced, asks if there is never a time when litigation shall end, and vested rights to settled beyond recall. In disposing of this dat the secretary lays down a principle which is to govern similar cases in the future. "More general in the future." allegations of fraud and misropresentation,' says Secretary Teller, "will not suffice, and to deliberately decide, in effect, in the absence of such absolute proof of fraud, that my predecessor and the officers under him reach erroneous conclusion, is to invite not only want of respect for the adjudications of this office and the dependent patents, but endless litigation. It is obvious that if such a course were adopted, titles in the western country would be of little value." He therefore decides in favor of the Placer locaters, Starr and others, thus leaving the present titles undisturbed.

DEATH OF A PIONEER.

Gen. A. C. Dodge of Iown Passes Away.

Burlington, Iowa, Nov. 21.—Gen. Augus tus C. Dodge, one of the first settlers of Iowa and one of Burlington's most honored citi zens, died in this city at 4 p. m. yesterday, after an illness of four days, at the age of 71 years. The announcement, though not entirely unexpected, was a severe shock to many in the community who had not been aware of the dangerous character of the disense, and evoked a general expression of orrow from all classes.

Angustus C. Dodge was born in St. Genevieve, Mo., Jan. 2, 1812. Early in life he immigrated to the state of Iowa, and his life is, it may be said, a history of that state for the last fifty years. He was a delegate in congress when Iowa was still a territory, he was the first United States senator from Iowa after the admission into the union, he was once a candidate for governor, and at its recent semi-centennial at Burlington he was one of the very few persens present whose residence in the state covered half a century. He was the son of Henry Dodge, who served with great credit in the Black Hawk war, was governor of Wisconsin territory, a delegate to congress, and a senator from Wisconsin from 1848

Bogus Doctor Factory.

CINCINNATI, O., Nov. 21, -A bogus diploma factory has been discovered here. It is tocated in North Fairmount, a city suburb, on the Cincinnati, Hamilton & Dayton railroad, just leyond Brighton station. The diploma factory is called the "American Health college," and professes to teach the "vitapathic" system of practice. Its proprietor and manager writes himself "Prof. John Bunyan Camp bell, M. D. V. D.," and those receiving diplo mas from his gracious hand are not only authorized to practice medicine anywhere in the United States, but are also made min-isters of the gospal. Dr. Campbell does not comply with the state laws, in that he sells to whomsoever will buy his printed question and answer for the sum of \$100 which litthe student to practice, and if the studen wants one of his "grand diplomes," which fits him to both practice medicine and preach the gospel, be can get it by paying \$50. The county prosecuting attorney has taken the ase in hand, and the matter will be brought before the grand jury at once.

Death of a Reroise.

NewPort, R. I., Nov. 2i.—Miss Lewis, a sister of Ida Lewis "The Grace Darling" of America died from consumption at Lim-Rock lighthouse, within sight of the boats used by herself and sister in rescuing many lives from drowning. Since she has gone, it can now be said that without her assistance many lives would have been lost in the vicinity of the light. Deceased was a young and handsome woman.

National Bank Sale.

NEW YORK, Nov. 21,-H. Victor New comb has sold his interest in the United States National bank to a syndicate that will assume control about the 1st of January. About \$300,000 stock was sold at 150. Logar C. Murray will be elected president.

SENATE AND HOUSE.

Possibilities and Probabilities of the Coming Organization.

Democrars not to Oppose Republican Organization in the Senate-The Speakership--- standall's Vote on Paper.

Chicago, Nov. 21.—The Times has the following special from Washington City:
It is expected that a reorganization of the senate will take place some time in December without opposition on the part of the Democrats. They resisted the general change of officers and employes when parties in the senate were evenly balanced, and the featublican majority was obtained by an arrange ment with Senator Mahone, but the conditions have now changed, and the Republicans have a majority without counting the two Virginia senators, both of whom will probably vote for the Republican caucus nominees. The candidates whom the Republicans attempted to nominate were Mr. Gorham for secretary and Mr. Riddleberger for sergeant-at-arms. The last-named gentheman has since been elected a senator by the grace of Mr. Mahone, while Mr. Gorham remains out in the cold. It is understood that he still aspires to the yacant secretaryship, but the most reliable Republican opinion here is that he will have to fight his battle over for the nomination by the caucus, with greater obstacles in his way than there were in the first instance. It is ac knowledged that Mr. Gorham was a very officient secretary during his official term, but at least some of the Republican senators think it would be politic to take up some new man. The present Democratic employes of the senate owe their continuance in onlice to the independent and conservative course of Judgo David Davis, who held the balance of power between the two parties, and used it to compell a fair division of patronage-the Democrats retaining the offices, and the Republicans taking possession of the committee clerks, and minor places, and control of the

committees

Now the Republicans will take possession of all of the offices and legislative machinery of the sonate, and will have it in their power to checkmate any decisive legislation in the direction of tariff reform that may be originated by the Damocratic house of representa sted by the Democratic house of representa-tives. This fact is used with considerable force as an argument against the selection of Mr. Carlisle or any other low-tarif-man for the speaker's chair. It is not de-nied, however, that Mr. Randall represent-a minority of the party on the tarif-question, and his apponents claim also that his tariff views are not those of a majority of the goods of the whole country. Asof the people of the whole country. Assuming this to be true, the anti-Randall men say a man ought to be nominated for speaker who would frame the committees with a view to carrying out the best and most widesprend tariff views of the national Democratic party, and the house ought to do its duty without reference to what the Republican senate might do. There is still insuffcient material here to occupy the whole at tention of those who are canvassing for the several aspirants for the speakership, but they are quite active in working upon what they have at hand, and they seemed disposed to feel the pulse of each new-comer to ascertain whether it would be practicable, under certain contingencies, to form a combination to defeat Randall. The specter of Samuel J. Tilden troubles the minds of many who know how warm is his friendship for Randall, and there is an ill-concealed fear that the old man at Gramercy park will attempt to influence the deliberations of the Democratic caucus. In deed, it has been positively asserted that one of Mr. Randall's friends has possession of a pri-vato letter, addressed to a member of congress, in which Mr. Tilden says that, in his opinion, wisdom and policy would alike point to the nomination of Mr. Randall for the speakership as the most prudent nomination

that could be made, in view of the presidential contest of 1884. Whispers of the presence of the Tilden influence in this form have been current for some days, and while no man has been found who will avow that he has seen the letter many say without hesitation that they hav no doubt that Mr. Tilden prefers Mr. Randall. The ex-speaker himself, when questioned by a correspondent, said: "I have no knowledge of such a letter. Mr. Tilden does not write his letters." Then after a pause he added, with a smile: "I think I know whom

It has been claimed that the Pennsylvanian could have 107 votes on the ballot, but the latest estimate received from his managers is that if Mr. Cox should be withdrawn Mr Randall will have 89 votes.

DREADFUL APPREHENSION.

Fears That the Steamer Manistee With Twenty-five Passengers, is Lost.

HANCOCK, Mich., Nov. 21,-It is feared that the steamer Manistee, plying between this port and Duluth, has sunk with crew and twenty-five passengers aboard. She left Bayfield at midnight on the 15th inst. for Ontanagon, on route for Huncock, and has not been since heard of. The steamer-Duluth and China left Baytield shortly after Manistee for same route, but did not see her. A fug was sent to find the lost stemmer and has returned having found adrift a backet marked Manistee and a portion of a pilot-house. The boat being old, heavily lades, and the sea being rough, it is believed she is jost, John McKay was her commander; George L. Seaton, clerk; P. Callen, on gimeer.

Counterfeit Money.

WASHINGTON CITY, Nov. 21 .- The solicifor of the treasury in his annual report says; Unlawful coinage has not diminished, the most dangerous one being that of the standard dollar, which was the same in weight, appearance and ring as the genuine, although it contained but 30 per cent, of silver. For two years past no contract to the standard but as the genuine silver. For two years past no contract that notes have been part in airm. iew counterfeit notes have been put in circulation. Attention is called to the fact that there is no law prohibiting the counterfeiting of notes of foreign governments, and this class of work is increasing. Congress is asked to take proper steps to prevent its contiunance.

The Latest Brute Arrested.

LOUISVILLE, Ky., Nov. 21.—David Johnson, who committed a horrible outrage upon Jessie Meng, the 9-year-old daughter of John Meng, has been captured in a wagon yard. He protests his innocence, but blood on his underelothing points to his guilt. He was very nervous, and gave an unsati factory explanation for the blood. He claims that Mrs. Meng has a grudge against him and makes this charge in reveuge. The little girl is still living, and will probably recover. She tells a strange story regarding the outrage.

PHILADELPHIA, Nov. 21.—The semi-annual session of the Grand lodge of Odd Fellows of Pennsylvania has begun, Grand Master Charles N. Hickok, M. D., of Bedford, presided. The session was the largest over held in this city, and was marked by the at-tendance of an unusual number grand masters. ber of decisions were announced, one of general interest to the order, being to the effect that dues of members include all assessments for which a momber is liable. The report of the grand representatives to the Sovereign Grand lodge was read by the past grand master, Samuel M. Gwynner, showing the following statistics of the Sover-Grand lodge for the past year; grand lodges 50; grand encampments 41; subordinate lodges 7,514; subordinate en-campments 1864; lodge invitations 47,549; lodge members 490,997; encumpment members 85,110; total amount expended for relief \$1. 882,443,88; total revenue of the order \$505, 946 being an increase in membership of 18, 050, and in revenue of \$201,068.83. Another Man Knows O'Donnell.

ROCHESTER, N. Y., Nov. 21.—The Post Express publishes a letter from a man who says he know O'Donnell, the murderer of Carey the informer, a number of years ago. O'Donnell was at that time one of the chiefs of the Mollio Maguires of Pennsylvania, and of the Molio Maguires of Pennsylvania, and that in connection with Dan Kelley, Jim Carroll, and a man called "Red Shirt." was interested in saveral mysterious "jobs," presumably murders. The three confederates were afterward hanged, and O'Donnell, who then called him of Theorem Moran accord. The united of self Thomas Moran, escaped. The writer of the letter describes O'Donnell as a stout-built man, about 45 years of age, and either freckled or badly pitted with smallpox. Plamond Thief In Juli.

NASHVILLE, Tenn., Nov. 21.—Rose Flink the expert diamond thief, with many aliases, was brought here from Louisville. She has lately victimized jewelers in all the principal cities of the south-New Orleans, Atlanta, Augusta, Charleston, Louisville, Chicago and New York. She is a protty (terman Jewess, about 25 years old. At the time of her arrest she was living in olegant style on Fourth near Chestnut streets, Louisville, with a man supposed to be Julius Malhouse, a noted sport. She is now in jail in default of \$2,000 bail.

The Advance in Freight Rates. ALBANY, N. Y., Nov. 21.-At a meeting of the railroad commission Commissioner O'Donnell's resolutions were offered, declaring that the proposed advance in freight rates between Chicago and New York on dressed beef and grain was inimical to public interest. The resolution was laid on the table, for the reason that the board required more time to examine into the matter and gather the information uccessary to its proper consideration.

Made an Assignment.

TEST SUIT DISMISSED.

One of the Suits Against the Brooklyn Bridge Dismissed. New York, Nov. 21.—Judge McAdem in the city court, rendered bis decision dismiss-

the city court, rendered his decision dismissing the complaint in the case of Lizzle Hannon against the bridge trustees for injuries sustained in the pande on the bridge on Decoration day. He said that while it was true that any individual who sustains an injury by the realization of a rubblic cilian has his by the negligence of a public officer has his remedy in law, yet public officers are not liable for the misconduct or malfeasance of such persons as they are obliged to employ. In other words, public officers, while liable to a civic abtion for willful and capricious omission of duty resulting in injury to the party complaining, are not liable for any neglect not personal. In the present case no asonal neglect has been proven. The negigence charged consisted, for one thing, in allowing the bridge to be overcrowded, but the evidence shows that, while but 87,000 persons were on the bride on the day of the accident there had been 183,000 persons who crossed it in safety on a previous day, and the arrangements were the same on both occasions. The trustees, acting individually, have no power or functions. The trustees are by law bound to meet as a board, in which a majority governs and which the minority has no practical control. To hold the trustees of a public work under such circumstances personally and individually responsible for nets such as the complaint charges, would entail a dangerous responsibility that few would be willing to assume. The case will be carried to the court of ap

THE IRON, INTEREST.

Panic Scouted, and a Revival Prealeted.

NEW YORK, Nov. 21.-Leading representatives of the interests scout the idea of a panic and assert that there is nothing in the pres-Since last spring many furnaces ent seure. have been blown out, and numerous rolling mills have put on single turn. A major the nail mills have fused to over-stock the market with their product. In regard to steel rails only those that can make rails at \$31 can afford to run regularly and the others will have to stop or run only at intervals when the demand increases. It is believed that the production of all leading iron and steel products will soon be no greater than the demand and prices will recover when this point is reached. A boom during the early part of next year is therefore not impossible. During the present month three furnaces in Pennsylvania and one each in New York, Georgia, Alabama and Michigan will blow in, all of charcoal, while in New York and Pennsylvania there will be two anthracite, and in Ohio, Alabama, Pennsylania, West Virginia and Tennessee there will be nine bituminous, in all nineteen furnaces which will blow in this menth, while the fur naces which will blow out will be six charcoal, three authracite and six bituminous.

The Garlington Inquiry. WASHINGTON CITY, Nov. 21.—Gen. Huz-en, chief of signal service, endeavored at a session of the Garlington court, obtain an admission from Commander Wild that the signal service was not to blame for the failure of the Protous expedition. Witness, however, declined to make such a statement, further than saying that Lieut Garlington was blameless in the matter, and Lieut Caldwell was recalled and stated that if an expert navigator had been employed the Proteus would not been crushed in the ice. Gen. Hazen then took the stand and proceeded to give in detail arrangement for litting out the expe dition and requested that the captain and overseer of Protous as well as the United States consul at St. John, should be brought before the court. He was not at all pleased with the attitude of Commander Wild, and especially as the latter declined to answer Hazen's questions but compelled tim to submit them to court.

More About Mahone.

WASHINGTON CITY, Nov. 21. - Virginia Democrats here are much incensed at Mahone's address, and the papers are full of denials of his statements. Ex-Congressman Dozendorf, Republican, in another interview regarding Mahone's allegation that the prosperity of the state is due to the Readjuster perity of the state is one to the Rendjister party, says: "Whatever there is in sight Mahone loys claim to." For instance, he takes credit to the Rendjisters for the fact that 800,000 belies of cotton were shipped from the port of Norrolk last year, whereas the lostings consensition of Norfolk. whereas the business prosperity of Norfolk is due to the good crops and the enterprise of its merchants, not one of whom votes the Readjuster ticket. Mahone might just as well say that the Readjuster victory last year was the cause of potatoes selling at \$6.50 a barrel on the wharves at Norfolk, while this year they are only worth \$1.50.

A Madman's Frenk.

DEDHAM, Mass., Nov. 21.—Just before midnight John Long, a blacksmith, living in a house at Isleton, owned by A. B. Wentworth, was awakened by Mrs. Jno. W. Benway and son, who informed him that Mr. Benway had placed a keg of powder upon the front plazza and had lighted a fuse attached to the keg. Long hastened from the house, but dared not go near the powder, the fuse was so short. Shortly after the powder exploded, doing considerable damage, but not so much as was expected, owing to the fact that the powder was not sufficiently confined. Benway is supposed to be in a state bordering on delirium tremens. He cannot be found. There has been some cumity between Long and Benway for the last three years.

Want Them Published in Chicago. CHICAGO, Nov. 21.—The directors of the Chicago board of trade received the report of the committee appointed to consider the advisability of publishing in this city instead of in New York as heretofore, reports of the visible grain supply of the United the visible grain supply of the Chief States. The committee strongly favored the change. It is alleged that serious errors are allowed to appear in the reports as pub-lished in New York, for a fraudulent purpose. It is claimed that as Chicago quotations mainly influence the grain markels of the world, the change will be a natural one.

Conrage is a noble trait. With some it requires greater courage to live than it does to die. When disease racks the frame, when sores cover the person, when aches are in every joint, when the muscles, are soft and flabby, when the least exertion gives fatigue, when the mind is filled with gloom and despondency, what is

there in life worth living, and yet many eke out just such a miscrable existence, living only for those who love them. When it is generally known that Brown's Trop Bitters will error the shore disorders.

When it is generally known that Brown's Iron Bitters will cure the above disorders how many hearts will be made glad! How many homes made happy!

HUCCING AS A FINE ART. A Chicago Parent's Sensible Advice to a Blushing Lover.

[Milwankee Sun.] A queer case has just come to light in Chicago. A young men spent an evening with his girl, and, during the evening, while the family was present in the purlor, he was as demure and bland and childlike as could be wished. The mother came into the room after the family had retired to got a handkerchief she had left, and the young man was scated in a chair in the middle of the room, while the girl was scated on a sofa, and nothing that the mother could see in the actions of either led her to think they were more than passing acquaintances. It seemed to her athough the young people had met before, but there was no evidence that they were very well acquainted. All night, after he had gone, the girl complained of a pain in her side, and in the morning a doctor was called, and he found that two of the girl's riby ware broken. Then it was to be set to be s ribs were broken. How it was done no body know. The girl could not tell for the His of her, though she blushed when asked about it, and the mother looked very wise as she looked at the doctor. The doctor made some inquiries, set the ribs and went away, and the girl proceeded to recover. That evening the young man called and

was astonished when informed of the extent of the girl's injuries, and wondered how it could have happened, though the mother watched his face close as be spoke and detected not only a blush but a profuse perspiration on his face. She been a girl once herself, and though she had never had any ribs broken she had been hugged some. It was a trying posttion for all of them. The father was away on a trip to Wisconsin, and when he came home the matter had to be explained to him. He was told that the ribs just simply broke themselves, and that noither the mother nor the girl nor the young man could account for it, and yet all three of them blushed terribly. The father patted his girl on the head, told her she would be better when she got over it, and then called the young man into the library. The young man was so weak he could hardly walk, and when he sat down he took out a handkerchief and mopped his brow and wished he was dead. The father looked the young man over and was sorry. He finally said:

"Young man, I guess I can give you some points on hugging. You must first learn that a girl is not constructed on the same principle of an iron fence or a truss bridge. A girl is a delicate piece of mechanism, like a fine watch, full of little springs, wheels, jowels, etc. The breaking of any one of these would cause her to cease keeping time and necessitate her being taken to a jeweller for repairs. In hugging a girl you don't want to go at it as if you were raking and binding, or catching sturgeon. I know that where the family sits up late with a young couple and spoils several precious hours of hug-ging, that unless the young man has a good head when left alone with the object of his affection, that he is liable to overdo the matter and try to make up for lost time. He seems to want to hug up a lot ahead and grabs the girl as though he wanted to break ber in two. This is wrong. You should go at it calmly and dollberately, even prayerfully, and be as gentle as though she was an ivery fan. The gentle pressure of the hand that a girl loves, oven the touch, is as dear to her as though you ran her though a stone-crusher. You should not grab her as you would a bag of oats, and leave marks on her that will last a life-time. A loving woman should not be made to feel that her life is in danger unless she wears a corset made of boller-iron. I hope this will be a lesson to you, and hereafter, if you can not control your feelings, I will provide a wooden Indian for you to practice on at first, until you have developed your muscle and got tired, and then we can turn our daughter loose in a room with you and not feel that it is necessary to keep a surgeon bandy. In allowing you to keep company with my daughter l do not agree to provide you with a human gymnasium, dressed in a Mother Hubbard wrapper and wearing bangs. You can readily see that a girl would not last a season through if she had to have ribs set once 2 week. Please think this thing over, and if the girl is well enough next Sunday you can drop in and try some more ribs. Now you go home and hug a hat-rack for an hour or two, and have it repaired in

the morning." The young man went out into the night air, took his hat off to cool his head, and hired a man to kick him.

A MILLIONAIRE'S MEMORIAL. The Church and Pursonage Built by the Hopkins Family in a Massachusetts

| Roston Journal.]

The new Congregational Church at Great Barrington is a marvelous church for a country town. The material used is the blue limestone of the town, with Connecticut brown-stone for the trimmings. The style is Gothic. The interior is very richly finished and furnished. Graceful columns, with gilded and foliated capitals, support arches of Southern pine. The walls are frescoed in olive tints with steneil patterns, tracing and relief of bright colors. Solid black walnut is the con-struction of the pews. The pulpit, which was designed by the paster, Rev. Evarts Scudder, is of solid mahogany, carved and paneled. In the main panel is an angel with trumpet blowing the words: "Behold, I bring you tidings of great joy which shall be to all people," and on other panels are carved inscriptions. The landing of the Pilgrims and the calling of the disciples are depicted in rich coloring on two of the large windows, and another (the gift of the Sunday-school at a cost of nearly \$1,000) bears the picture of Christ bless-

ing little children. The parsonage and barn, now building, are the gift of Mrs. Mary F. S. Hopkins, of San Francisco and Great Barrington, widow of the great milldonaire, Mark Hopkins, and will cost, complete, \$100,000. She also gave \$5,000 toward the church, and her brother-in-law, Mosce Hopkins, also \$5,000. The organ in the church is the gift of

The makers claim for it that, while not the largest, it is the finest organ in the world. It has 94 stops and 3,954 pipes. The keys are of polished abony and ivory, and the case, designed by Audsley, of London, is of cherry, elaborately carved. The instrument is from the Rocseveit manufactory, New York. Chronic Diseases. A Special Study for Years.

Dr. F. B. BREWER, Has made Chronic Diseases of the Throaf, Lungs, Heart, Stomach. Liver, Kidneys, Nerves

and Blood.

A special treatment for years. He is not a boastful, ignorant pretender, but an educated physician, seeking to do good, by devoting his talent and energies to the treatment of a class of mulacies that have been with him a long and patient study. To be able to treat successfully chronic diseases it requires that a physiciau should be a sound, thorough scholar in the art of science and medicino generally. He should give his entire time to their study, be thorough in his investigations and have a long and varied experience. Dr. Lrewer claims to work no wonders or to do any nicre than any well telucated physician can do, who devotes his whole ling to the study and treatment of chronic diseases exclusively, and has had his many years of experience. For years Dr. Brewer has visited the the places he now visits, and has obtained his reputation by being honest in his dealings, candid in opinions and reasonable in his charges. Those who are afflicted are invited to call, investigate and decide for themselves. It will cost nothing to do so. Address all letters F. B. BREWER, M. D., Lock Box 350, Chicago, Ill

THE TREACHEROUS BIVER.

Particulars of the Prowalcy of little

Frankie Hopgood. Yesterday afternoon at half past three o'clock, little Frankie Hopgood fell through the ice in the rear of Jamesville | week. morocco factory and was drowned. The sad news reached the Gazette office just turer connected with the Y, M. C. A., of as we were putting the forms of the paper on the press, and in the hurry to make mention of the fact, the name was made Hopkins instead of Hopgood. Little Frankie was at play on the ice with a companion younger than himself, and venturing out on the treacherous ice he broke through and was drowned. His playmate Georgia Farmer, ran home and told his mother of the accident, and the B. Maria Backlin to John C. Johns alarm was given. Mr. John McCarty. tory immped into the river and caught the boy, but was so benumbed with the cold water that he almost lost his own life in trying to save the little boy. He struggled hard, keeping little Frankie above the water, but was finally compelled to again let the little one under water while he was struggling to reach a boat that had been shoved out to his aid. Mr. McCarty held fast to the child, and made gress from this congressional district, exa last desperate effort, succeeding in reaching the boat and bringing the drowned boy to shore. Mrs. Farmer, in her attempt to give aid, fell through the ice, and went into water which reached her waist. The drowned boy was taken to the home of his mother, Mrs. Mary J. Hopgood, who lives in the little house just north of the morocco factory, when Dr. Q. O. Sutherland was called, but all efforts to bring life back to the body of the darling little boy were fruitless, and he was pronounced dead The sad death of little Frankie is a severe blow to the mother and family, and they will receive the heartfelt sympathy of

The funeral will take place at 10 o'clock to-morrow forenoon at the house.

The Capitol Extension.

Mr. Oscar F. Nowlan, one of the contractors of the capitol extension at Madison, was in the city for a short time today, and returned this evening. The verdict of the coroner's inquest will not effect his relation to the capitol extension, as contractor. The commis stoners have instructed Bentley & Nowian to rebuild the south wing under new plans and specifications made by Boynton, an architect of Chicago. These will add very much strength to the building. The north wing will also have new columns and piers equal in strength to the new ones in the south wing, which will give it all the substantiality the hailding requires.

The jury find that O. F. Nowlau, is gain ty of grave error, and contributed to the fulling; and that Architects H. C. Koch and D. R. Jones gave the construction manflicient care, etc.

The many friends of Mr. Nowlan in this city and elsewhere will be glad to learn that he will have the pleasure of finishing the important work on the capitol extension. He is not held responsible for the weakness of the column or the piers as the contractors did their work according to the plans furnished them by the architect. As to the special work of the contractors, the expert architects and builders, A. C. Nash and Godfrey Ludwig, of Cincinnati. C. F. Strunk, of St. Paul, and James R Willett, of Chicago, reported in their conclusions that the masoury work was "fair. ordinary work, calling for neither special praise nor blame."
